6. RESULTS AND DISCUSSION

6.1 Test Reports

Test Condition	Input	Expected Result	Actual Result
Login	Username=abc, Password=abc	Login Successful	Login Successful
Login	Username=abc, Password=pqr	Wrong username or password	Wrong username or password

Example is given in table. Add as many as test cases perform for your application and mainly on the business logic

6.2 User Documentation

Make manual for user add screenshots of working projects from start
